# Utsab Raj Acharya

India | acharyautsab68@gmail.com | +91 9880647721 | LinkedIn | GitHub | Portfolio

## Professional Summary

AI Engineering undergraduate (CGPA: 9.26/10.0) with experience in data science and hands-on experience in machine learning, NLP, analytics and backend development. Skilled in Python, SQL and Power BI, seeking Data Science, AI, ML or Software Engineering internships.

## Education

**Jain (Deemed-to-be) University, Bengaluru, India** — Aug 2024 – May 2028 (Expected)

B.Tech, Computer Science & Engineering – Specialization in Artificial Intelligence — CGPA: 9.26/10.0

- **Relevant Coursework:** Data Structures & Algorithms, Statistics & Probability, Database Management Systems, Machine Learning, Artificial Intelligence, Discrete Mathematics & Graph Theory

## Experience

**ITPark Nepal** — June 2026 – August 2026

Data Science Intern (Remote) – Kathmandu, Nepal

- Cleaned, transformed and validated structured datasets using Python to improve data quality for analysis and machine learning workflows.
- Performed exploratory data analysis (EDA) to identify trends, correlations and outliers supporting feature selection and data-driven decision making.
- Built and evaluated machine learning models for classification and regression tasks while documenting workflows and findings for a remote data science team.

## Leadership

**Neuron Club, Jain University** — Sep 2025 – Present

Tech Team Lead

- Led the technical division of a department-level student club, driving technical initiatives and supporting event execution.
- Organized and managed "Cheat Better", an AI-assisted coding competition involving 20 teams and 80+ participants, overseeing planning, logistics and participant engagement.

## Projects

**Semantic Search Engine for Movie Discovery** | Python, NLP, Vector Embeddings — GitHub

- Developed a semantic movie search engine on 4,800+ films using transformer embeddings and cosine similarity.
- Built a hybrid retrieval pipeline combining semantic search and metadata filtering for improved relevance.

**Graph-Based Movie Recommendation Engine** | Python, Graph Theory, Flask — GitHub

- Designed a graph-based recommendation engine by modeling users and 4,800+ movies as a bipartite network.
- Generated personalized recommendations using graph connectivity patterns and implemented backend functionality with Flask.

**FIFA World Cup 2026 Player Performance Analysis** | Python, Pandas, EDA, Feature Engineering — GitHub

- Analyzed 1,200+ players across 70+ features through EDA, data cleaning, per-90 metric normalization and position-specific feature scaling.
- Built separate scoring systems for GK, DEF, MID and FWD with iterative weight tuning, yielding Top 10 rankings per position and a balanced 4-3-3 Best XI.

**Sales Analytics Dashboard** | Power BI, DAX, SQL — GitHub

- Built an interactive Power BI dashboard integrating multi-source sales data and KPI reporting.
- Designed a star-schema model and DAX measures for revenue, customer and product performance analysis.

## Technical Skills

**Languages:** Python, SQL, JavaScript

**Data Science:** Pandas, NumPy, SciPy, Scikit-learn, EDA, Data Cleaning, Data Pre-processing, Statistical Analysis, Feature Engineering, Regression, Classification, NLP, Recommendation Systems

**Visualization:** Power BI, DAX, Matplotlib, Seaborn, Plotly

**Backend:** Flask, Django REST

**Tools:** PostgreSQL, Git, GitHub, Postman, Jupyter Notebook, Excel

## Achievements

- Finalist, Smart India Hackathon 2025, for developing Renyora AI, an AI-powered health assistant chatbot.
- Finalist, Inceptrix Hackathon 2024, for developing NeuroLens, an AI-based system analyzing handwriting and voice patterns for cognitive decline assessment.
